EN 420: GENERAL REQUIREMENTS FOR PROTECTIVE GLOVES

- No chromium (2 mg/kg)
- Neutral pH
- Dexterity, Comfort
- Transmission and absorption of water vapour.

EN 388: MECHANICAL HAZARDS

EN 407: THERMAL HAZARDS

SYMBOL GUIDE

EN 388

EN388
European Standard relating to gloves that are intended for general industrial usage. These standard covers abrasion, cut, tear and puncture resistance of the gloves.

EN 407

EN407
These standards refers to protection against thermal hazards and covers the burning behavior, contact heat, radiant heat, convective heat, and molten metal splash resistance of gloves.

Packaging
Standardized Packaging measures of gloves 12 pairs in a single polythene bag and 10 such bags in a carton.

Retail Bag
Items displaying this symbol are packed into individual printed retail bags

Color Swatch

Color swatches are intended as a guide. Actual item colors may vary from the printed colors shown here.

CE Marking

The CE marking is the manufacturer's declaration that the product meets the requirements of the applicable EC directives

Sheepskin:

Extremely soft leather required where optimum dexterity and touch sensitivity needed

Goatskin:

High natural oil content makes goatskin very soft and pliable. Excellent tear resistance even with very thin thickness.

Cowhide:

Offer good comfort, durability, good abrasion and heat resistance. Ideal for heavy duty work task.
